**Mirrored Lenses**

- Backwater Green™:** Ideal for flat fishing, snow skiing and cloudy days. Amber based to brighten the view into the water and shadows. Preferred by many top fishing guides to achieve maximum reduction of glare, not light.
- Offshore Blue™:** A grey base lens specially designed for deep-water fishing and boating. Allows you to see the lines and baits clearly behind the boat, plus detect objects or fish on top of the water.
- Crown Royal Luminator™:** Our best lens for low level light situations such as early morning and late evening. Extensively tested and approved by the Crown Royal Fishing Team. The yellow based lens is ideal for driving in variable light situations. Preferred by golfers.

**24K Gold:**

The ultimate fashion statement! Darkest lens available using technology from the astronaut moon-walk. True 24k gold inside the lens for those who are super sensitive to bright sunlight or just want the darkest lens.

**OCEAN WAVES**

Pleasing to the eyes... from both sides of the lens!

Polarized sunglasses not only reduce the amount of light that reaches the eye, but also eliminate glare and harmful UV (ultraviolet) light.

**Ocean Waves lenses are 100% polarized:**

The degree of polarization can vary from 15% to 100%.

We offer you the best polarization and UV protection available on the market. The unique construction of our lens blocks all the UV light up to 420 nanometers.

**Try a pair on and see for yourself!**

Mirrors are encased between two glass lenses making the mirrors impossible to scratch and they are vacuum coated with 12 separate coatings to produce the utmost in consistency and distortion-free visual clarity. Available in 24K Gold, Blue, Green, and Purple (best for golf) mirrors.

Our anti-reflective coatings are state-of-the-art. Seven coatings of magnesium hexafluoride are thermally applied by a unique vacuum process to the inside of the lens to ensure absolute consistency. They absorb the "bounce-back" of glare and UV light.

Scratch resistant coatings

Adhesive, strongest made in the world

Ocean Waves polarization film is the best available on the market.

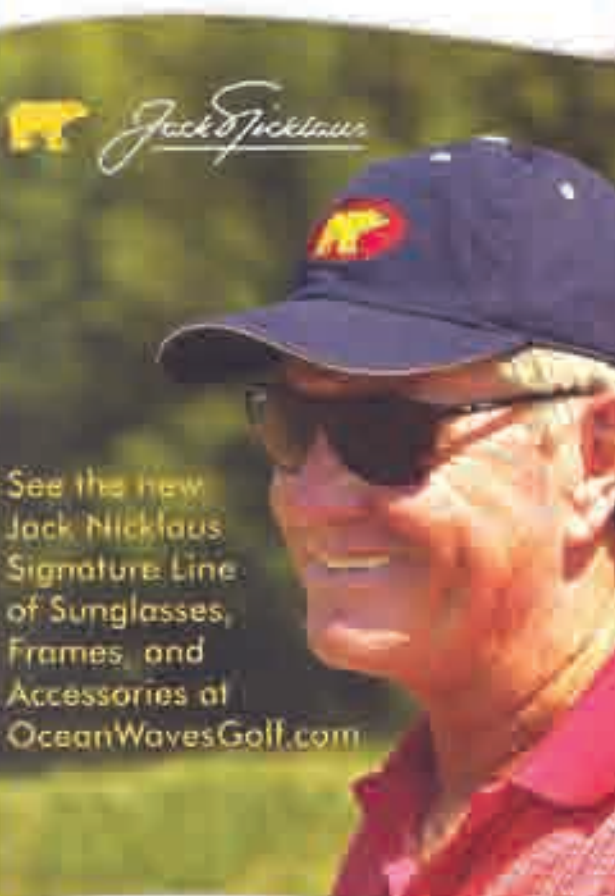

Glass lenses with No Distortion for clearer vision. Toughest material to scratch!
